ASTI Medical House Officer Survey

ASTI is doing a survey to understand the challenges faced by Medical House Officers (HO) in Malaysia. Your information will help the next generation of medical aspirants to be better prepared to the needs of the medical industry. We will also highlight any challenges discovered to the authorities to help them streamline the industry. This survey does not collect any personal data.

Please take this survey if you are either:

- *a) Waiting for House Officer Posting
- b) Currently serving as a House Officer*

The Association of Science Technology and Innovation (ASTI) is an association of educators, scientists, industry representatives and individuals committed to advancing the role of the scientific community in inspiring the youth of the nation to join and excel in the world of science.
